window下python连接hive

试过 pyhive, pyhs2 在windows下很麻烦,没法用。

用pyodbc, odbc数据源可以选择Cloudera或者Hortonworks DataDirect, 官网下载下来安装就好了。

```
#! /usr/bin/env python

# -*- coding: utf-8 -*-
import pyodbc

conn = pyodbc.connect(DSN='Sample Cloudera Hive DSN',
autocommit=True, UID='yangze', PWD='***')

cur =conn.cursor()

cur.execute("select * from sample_07 limit 10")

row =cur.fetchall()

if row:
    print(row)
```
