hive 解锁

hive存在两种锁，共享锁Shared (S)和互斥锁Exclusive (X)，

你可以使用命令 show locks tablename；查看你的表状态

例子：

show locks decision.changli_tmp_user_info;
unlock table decision.changli_tmp_user_info;

分区表解锁：

Hive Unlock All Partitions

```
irb> s = Date.new(2014,03,01) # The start date of the partitions
irb> e = Date.new(2014,05,01) # The end date of the partitions
irb> (s..e).each {|x| puts "unlock table your_table
partition(dt='#{x}');"}
unlock table your_table partition(dt='2014-04-01');
unlock table your_table partition(dt='2014-04-02');
..
unlock table your_table partition(dt='2014-05-01');
```
