azkaban通过脚本打包发布工程

```bash
#/bin/bash
#获取sessionID
session=`curl -k -X POST --data
"action=login&username=azkaban&password=azkaban" https://120.132.4.XXX:8888`
sessionID=`echo ${session} | sed -e 's/.*id" : "//' -e 's/".*//'`
echo $sessionID
#Create a Project
#curl -k -X POST --data
"session.id=$sessionID&name=MyProject&description=MyProject" https://120.132.4.XXX:8888/manager?action=create
#zip
#zip -r workflow.zip ./workflow/*
#Upload a Project Zip
curl -k -i -H "Content-Type: multipart/mixed" -X POST --form "session.id=$sessionID" --form
'ajax=upload' --form 'file=@workflow.zip;type=application/zip' --form
'project=MyProject' https://120.132.4.XXX:8888/manager
```
