Cannot obtain block length for LocatedBlock故障分解决

cat一下某天的HDFS文件内容的时候突然报Cannot obtain block length for LocatedBlock异常，get也一样，这样无法访问hdfs文件的问题必须解决

```
hdfs debug recoverLease -path <path-of-the-file> -retries <retry times>
```

hdfs debug recoverLease - path /user/hive/test.db/file -retries 3
执行完命令后再次cat对应hdfs文件已无异常，顺利显示内容，问题解决.

用小时查询快速定位出错的文件
select count(*) from ee.ee_ubtevent where dt='2017-09-26' and hour between '17' and '24' and domain='qingjie';
